Dear Stevia,

Just prior to Thanksgiving, I wrote you a letter regarding the idea of a Video Studies Center which you said you were taking up with some others. As I haven't heard from you I am wondering whether you received my letter or not. I remember that you said once that it took you a long time to answer correspondence, but I thought such an idea as a Video Studies/Crafts Center would initiate more of a response. Did you receive my letter? Please let me know as I am willing to invest energies into such a project.

Best,

Dear Steina and Woody,

I am writing to ask you about some equipment that you designed with George Brown and are now using in conjunction with the Rutt/Etra synthesizer.

If you were living in New York City I would simply call, but as you are in Buffalo could you answer briefly via letter a few questions from me?

Are you using a 2-input switcher with the 6-layer keyer or did you design a switcher that can mix 6 individual inputs? Could you briefly describe the keyer/switcher relationship? Would the same type of keyer and/or switching equipment be available for sale from you or George Brown?

I would very much appreciate hearing from you. Thanks very much.
